

Shifa OMS — Pricing Proposal

Purpose-built Order Management System for Shifa Herbal Remedies

COMPLETE PLATFORM

A purpose-built Order Management System for Shifa — 17 complete modules, weekend staff training and full source-code handover.

One-time build · 17 complete modules · Weekend staff training · 3 months post-launch support · Source code handover · **server hosting on us for the first year**

₹36,999 one-time

₹68,000 of delivered value for ₹36,999 · Save 66% vs. alternatives

What it costs vs. what you sell

At roughly **3,000 orders/month** and an average order of **₹300**, you turn over about **₹9,00,000 every month** (~₹1.08 crore/year). Here's how the platform compares to that:

₹9,00,000

Your monthly sales
(3,000 × ₹300)

₹36,999

One-time build —
about **4%** of a
single month's
sales

₹5,499_{/mo}

Post-launch
support — first **3
months**

**Year 1
free**

Server hosting on
us for the first year;
~₹10,000/yr after

In short: the one-time build is barely **4% of a single month's sales**, and from year two the only infrastructure cost is about **₹10,000 a year** — under half a day's revenue — so the system pays for itself within days.

Why Your Investment Is Priced This Way

Full transparency on what the one-time price reflects — a considered, fair investment in a finished product, not an arbitrary quote.

A complete, proven platform

You receive a fully built, production-tested system — 17 modules backed by 490+ automated tests. You are paying for a finished, dependable product, not an open-ended, higher-risk from-scratch build.

You own the source code

Complete source-code handover with no vendor lock-in and no per-user subscription. The platform is yours to keep, extend, or move at any time.

On-site training & 3 months of support

Weekend on-site training for your whole team, followed by three months of hands-on post-launch support so your staff go live with confidence.

Hosting handled for the first year

We cover server hosting and infrastructure for the first year. Thereafter the only ongoing infrastructure cost is approximately ₹10,000 per year.

Built for how Shifa operates

A purpose-built order-management engine — role-based access, COD reconciliation, GST invoicing and full audit trails — tailored to your workflow rather than a generic template.

One-time cost, predictable thereafter

A single upfront investment with clear, minimal running costs — no recurring licence fees quietly eroding your margin every month.

Why Choose Weblithic for Shifa OMS

We don't just build software—we deliver complete systems with training, support, and proven workflows.

Pre-Built & Tested

Not a from-scratch project. 490+ automated tests ensure everything works before you pay.

Purpose-Built Workflow

Real order workflow engine with role-based access, audit trails, and COD reconciliation—not templates.

Hands-On Training

Full weekend on-site training with your team. We don't just hand over software and disappear.

Your Code, Your Data

Complete source code handover. No monthly subscriptions, no vendor lock-in.

Complete Financials

GST invoices, P&L reports, COD reconciliation, Vyapar exports—all built-in.

Launch Support

3 months of hands-on post-launch support (₹5,499/month), with server hosting on us for the first year — just ~₹10.5K/year for infrastructure after that.

★ **Exclusive Training Included**

Weekend On-Site Training with Your Team

We spend a **full weekend on-site with your sales team**—training every salesperson on the app, then sitting with them for a couple of hours to process a real order end-to-end. We do the same with the admin on approvals, dispatch, and reconciliation. Your team goes live confident, not confused.

- ✓ All salespeople trained together
- ✓ First real order processed live, with us
- ✓ Admin walkthrough: approve → dispatch → settle COD
- ✓ 1 session virtually, over a weekend

What's Included

17 complete modules covering everything from order capture to financial reconciliation, sales intelligence, forecasting and a mobile app — all bundled into the one all-inclusive price.

#	Module	What It Covers	Value (₹)

14	Sales Performance & Targets (Salesperson 360)	Team leaderboard, per-rep KPIs (orders, revenue, conversion, delivery success) and monthly sales-target tracking so admins can coach and compare the team	4,500
15	Business Analytics & Forecasting	Customer retention cohorts (repeat-buyer rates), revenue & product-demand forecasting, plus the automated statistical insights engine (anomalies, low-stock, RTO risk)	5,000

16	Mobile App, Offline & Push	Installable phone app (PWA), offline order capture that auto-syncs on reconnect, phone-camera barcode scanning for packing, and browser push notifications to staff	5,500
17	Staff Announcements & Communication	Admin-posted announcement banners every staff member sees on login — internal comms without WhatsApp groups	1,500
Total Delivered Value (17 modules)			₹68,000
 Your All-Inclusive Price			₹36,999

Overall Cost of the Application

A clear, all-in view of what you pay.

One-time platform build 17 modules · weekend training · source-code handover · hosting free for year 1	₹36,999
Post-launch support (AMC) ₹5,499 × 3 months	₹16,497
Overall Cost	₹53,496

Please note:

- **WhatsApp message charges are borne by the client** — paid directly to the WhatsApp provider (~₹1.20–1.40 per order); a pass-through cost we do not mark up.
- **Server hosting is on us for the first year.** After one year, approximately **₹10,000/year** towards infrastructure.

Flexible Payment Options

Choose the payment plan that works best for your cash flow.

Full Payment

₹36,999

One-time payment, complete platform delivered

- ✓ No payment plan fees
- ✓ Immediate deployment
- ✓ Best overall value

RECOMMENDED

Payment Plan

₹13K + ₹12K + ₹12K

Spread across 3 milestones over 2-3 weeks

- ✓ ₹12,999 on Day 1 (start)
- ✓ ₹12,000 after 7-day trial
- ✓ ₹12,000 when live in production

Support & Hosting

₹5,499/month

Post-launch support for the first 3 months

- ✓ Bug fixes & updates
- ✓ Priority WhatsApp / call support
- ✓ Server hosting on us for year 1
- ✓ ~₹10,000/year infra after year 1

Ongoing Running Costs

Transparent breakdown of monthly operational costs after the one-time build.

 **WhatsApp API Note:** The WhatsApp API cost (₹1.20-1.40 per order for 4 messages) is directly paid by you to the WhatsApp service provider. We don't mark this up—it's a pass-through cost that you control based on your order volume.

Item	Details	Monthly Cost (₹)
Post-launch Support	Hands-on support for the first 3 months (bug fixes, updates, priority support)	5,499/mo × 3 months

Cloud Hosting & Infrastructure	AWS cloud (EC2 app server + managed RDS database) — on us for the first year , then borne by you	0 (year 1), then ~10,000/year (~833/mo)
WhatsApp API	4 messages per order × ₹0.30-0.35 per message (client-borne cost, not charged by us)	~1.20-1.40 per order
WhatsApp Monthly	Estimated 3,000 orders/month × ₹1.35 avg per order	~4,050
Domain & SSL	Annual renewal (₹1,000/year)	84
Months 1–3 (with support, hosting free)		~₹9,633/mo
Month 4 → Year 1 (hosting still on us)		~₹4,134/mo
After Year 1 (incl. infra ~₹10.5K/yr)		~₹10,499/yr
